

Troubleshooting Internet / Proxy problem at home.

- NOTE: The following steps are shown using a Lenovo Yoga (from the JB-HiFi portal). Different devices may look different.

Q: We are having internet connection problems at home / proxy errors?

Try:

1		Click the Window icon in the bottom left of screen ... then immediately start typing the word "control" (or enter the search bar and start typing)
2		Click the Control Panel icon

3		Find the Internet Options button and click it
4		Click the "Connections" tab. Then click "LAN settings"
5		Click the option for "Automatically detect settings"
6	Click "OK" and try to connect to the internet again on whichever program was having difficulty.
